THE SUICIDE.

And what the phantom glory?

Why pants the vat'ry for a name,

taken he who climbs the steep.

He gains the height-it is to weep;

He smiles—his heart is bleeding.

But late the strain of pleasure rose,

Flisheart seem'd pillow'd on repose :

Yes, false ambition! 'twas thy slave,

pared the Omnipotent to brave,

With deed that bids us falter.

Thy bosom whelm'd with sorrow;

of hope shall cheer the morrow.

6. Choose your company among men of virtue, egular hibits, and good sense-so that your own character, habits and manners may be formed on a good model. This will save you much trouble, and redound in the end greatly to your advantage.

> A FRAGMENT. SELECTED.

One evening, when nought was to be heard but the light tread and soft billing of happy lovers, Romantico resolved to walk and enjoy the balmy fragrance of heaven. With feelings unutterable, pensive and lonely, he was bending his steps toward the seat of our worthy Patroon, near whose dwell. ing flows a gurgling rivulet, whose banks are shaded by trees of romantic import, beneath one of which he was wont to seat himself, and muse on things not of earth,-when he espied, at some distance, a female, wandering slow and lonely, musing, doubtless, on the scenery around her. "There," exclaimed Romantico to himself, "is one of those fairies who take delight in relieving the sorrows of man!" Urged by feelings which he could not suppress, he approached her, and, in a humble tone and diffident air, said, "Delightful evening, Miss!" The fair being, startled-glanced her dark eyes upon him-and seemed to like his appearance.

She assented to the remark with a low "Yes. sir." Romantico approached nearer to her, and felt confident that she was just the being to whom he could unbosom his thoughts. His eye beamed with delight as he walked by her side, and giving vent to his ideas, he entertained the fair one with a dissertation on the fragrance of the air and the romantic beauty of the scenery,-much, doubtless, to the edification of the astonished girl. His feelings, by a rehearsel of all these delightful things, and with the consciousness of walking by the side of an "angel," were worked up to such an exstatic pitch, that seizing the hand of the unresisting girl, he pressed it to his bosom, and implored her, in the most pathetic terms, to regard him as her lover,and added that, to gratify even the smallest of her wishes, he would explore the most distant regions of the earth. To this rapturous effusion, Miss Abigail said not a word, but gazed with astonishment on Romantico, who was now kneeling at her feet, kissing her delicate hand. She stood awhile in a dubious state of wonderment, revolving in her mind how to proceed. She, at length however, in something of a commanding tone, bade him get up and follow her. Her words were like magic. Romantico arose, and heroically exclaimed, "Fallow you? yes, to the ends of the earth!"-She glided along-our hero following-until, at length, she stopped, and pointing to a spring, manifested a desire to drink-adding that it was the ulphur Spring. Finding nothing at hand to drink out of, our hero was about to apologise, when the girl bid him not be uneasy-and, kneeling down, applied her lovely lips and nose to the fount. Romantico, le ning himself against a tree, folded his arms on his breast, sometimes gazing upon the moon and sometimes upon the fair object before him, who seemed, to his imagination, to be a creature of light. When she had satisfied herself, she arose, and signified to Romantico that, if he wished, he might drink. He gladly accepted the offer. What were his emotions, when he kneeled down, and put his lips where hers had been! But-oh, shame! shame! -- while he was drinking, she placed her foot upon his nether end, and, pushing, precipitated him headlong into the spring! Loud was the splash, and long was it ere our hero could extricate himself from his disagreeable inuation. With a dripping face and rueful counenance, the romantic Romantico turned aroundbut it was only to eneeze at the angel, whose white form was rapidly vanishing from his view.

LA PATETTE.

We take pleasure in laying before our readers every fact connected with the early history of this great man which comes to our knowledge. His principal aim, throughout life, seems to have been, the preservation of the rights of man, which he has always fearlessly contended for, though not with the success which should ever recompense the efforts of patriotism and virtue. The following is copied from the Albany Daily Adver-

The visit of La Favette to this country having given rise to so much remark, and aroused the grateful feelings of our citizens, it may not be amiss to give the public a sketch of his life. The cause of liberty has always been next his heart, and if circumstances have not always favoured his operations in the political world, yet never has his fair tame been sullied by a single action inconsistent with his avowed principles. His life and fortune were always at the service of his country, and he has ever followed the cause of liberty with the purest disinterestedness, and the most unshak-

en zeal. He was born in the year 1757, at Auvergne, in France-a province celebrated for the independence and valour of its inhabitants from the earliest times, and now composing the two departments of Cantai and Puy de Dome. His ancestors were among the first people of the province, and had ever been conspicuous for their independent spirit and their chivalrous contempt of danger. In the spirit of his fathers, he became the early advocate of political freedom, and falling into the society of those who had espoused his principles, he imbibed the most ardent attachment for liberty. With these feelings, it is not singular that his attention upon the army for protection. The imbecility was directed to America. In spite of the obstacles | and distrust of Louis prevented him from acced- the cleanliness of the cook. There is scarcely a | first; the sentine! will cry ' Qui vive!' You must

in a vessel fitted out at his own expense, with changed the current of affairs, which he arrived safely at Charleston, (S. C.) in January, 1777. He immediately entered and served with the army as a volunteer. On the 31st July, in the same year, he received his appointwill then speak prudently, and with due regard ment as Major General from Congress, in consideration of his zeal, and illustrious family connexions,' which he accepted on condition that he should be allowed to serve without pay or reward. The Marquis distinguished himself on numerous occasions. At the battle of Brandywine, he behaved with undaunted bravery, threw himself into the hottest fire, and when wounded, refused to quit the field. On the 25th November of the same year, while still suffering from his wound, with a small party he repulsed a superior force of Hessians and British grenadiers. For this he was entrusted with a command suitable to his rank,-After two years absence from his own country, he obtained leave to return to France. He carried with him the most flattering testimonials of his worth and services, and received a sword from the hand of the American minister, in the name of Congress, soon after his arrival at Paris. While absent, he engaged with all his soul in the cause of the United States, and succeeded in gaining the countenance of the French government.-He returned in 1780, and arrived at Boston in the Hermione frigate, Capt. Le Touche. It may not be improper to mention, in this place, that the French ministers, however disinterestedly they appeared to act, were said to have been influenced in their conduct at that time, by the hope of regaining

Canada from the possession of the English. In 1781, La Fayette was ordered to Annapolis, with a separate and independent command, for the purpose of driving Arnold out of Virginia, but from the want of co-operation on the part of the French fleet, the attempt failed. He was at this time of great service in checking the marauding expeditions of Gen. Philips, and was soon afterwards opposed to Cornwallis, the greatest General sent against us during the revolution. Although his forces were few, his men hadly clothed, and suffering much from a want of healthy food, La Fayette supplied their wants from his own purse, gallantly maintained his ground, and completely succeeded in the protection of the public stores, after a series of masterly manageves. On first hearing that La Fayette was to be opposed to him, the British commander bad exultingly said, "the boy shall not escape me;" but he found himself so often baffled by his young enemy, that it became necessary to use the greatest vigilance to prevent his own army from being surprised.

At the siege of Yorktown, La Fayette was again eminently conspicuous, and materially assisted in the capture of the General he had contended against. The war now assuming a most favourable aspect for the cause of liberty, he obtained permission to return to his own country, where he thought his services were wanted, and he re-embarked in 1781, loaded with honour, and the gratitude of the American people.

On his arrival in France, he was received in the most enthusiastic manner. His praises were sung in the streets, busts and pictures of him filled the shops, and universal popularity attended him. He was elected without opposition a deputy to the States General by his native province. When these were superceded by the National Assembly, he came forward in that body (1788) with his celebrated declaration of the rights of man. He opposed the measures of the court with such firm ness, that he was made President of the Assembly, and Commandant of the National Guard. He accented the latter post with pleasure, and swore to be faithful to the liberties of his country. It is un necessary to mention with too much minuteness the numerous affrays and quarrels that took placat this time between the King's body guards and the national troops. It is sufficient to remark, that the whole influence of La Fayette was used to preserve order and regularity in the French Capital, and to alleviate the public distresses .-When he was ordered by the commune of Paris to proceed to Versailles with his army and take session of the out-posts, be restrained the violence of his soldiers-and assured the King and Queen of their safety, and saved the lives of fifteen of the household troops who had been selected as the victims of the infuriated assailants. He also advised the Duke of Orleans to leave the kingdom, as his presence gave countenance to many sanguinary procedures.

The popularity of La Fayette continuing to in crease, he was, on the 14th July, 1790, made General in Chief of the National Guards of France. At this time he occupied a most important stationthe eyes of the whole world were fixed upon him. A boundless influence and a devoted army might have carried him successfully to the highest grade of power. In a word, on him reposed the destinies of France.-This was the crisis of his reputation, and from his course at that time, his friends and enemies took their opinions of his character .-There was but one course for La Fayette to pursue, and that was the support of liberty, and the maintenance of the public tranquility. He held, as it were, a magnanimous neutrality between the different parties, when their projects went beyond the laws of justice and moderation. He gave his vote for the trial by jury, and the emancipation of people of colour. But in the spring of 1791, the tide of public feeling began to change. No thing had been done to settle the affairs of the nation, and the violent reaction of parties commenced, in spite of the restraint imposed apon them .-Even his army became affected by the intrigues of s enemies, and when Louis XVI wished to visit . Cloud, and La Fayette gave orders to let him pass, he was for the first time disobeyed! Disgusted with this want of subordination, La Fayette threw up his commission, and did not resume it until the most humble apologies were made to him. When the King afterwards actually fled, he was suspended for being concerned in his flight, and the most violent abuse both in and out of the assembly was heaped upon him. The retaking of Louis at Varennes checked this torrent for a short time, but the royalists now turned on him from one side, and Marat and the friends of the Duke of Orleans accused him of treason on the other .-His life was actually attempted by a ruffian of the name of Fournier, whom he suffered to escape unpunished. When the constitution was adopted, in the spirit of a Washington, he resigned his command, alleging that the emergency which required his services was now over. On this occasion a golden medal, and a bust of Washington, were presented to him by the city of Paris. He was offered, in addition, a full remuneration for his losses by the revolution, and this he magnanimous ly declined. In 1792 he was given the command of the army of the centre near Ardonnes, but no opportunity offered in which to distinguish himself. Observing, however, the wanton and unne cessary indignities offered the King, he caused remenstrances to be forwarded from the differen corps of the army. These producing no effect, he went in person to Paris, to make his complaints. The military once more opened their arms to re-

ceive him, and asked to be led against the Jacobin

Club, the authors of the injuries of which he com-

On the 10th of August, memorable for the horrid mas-acres at Versailles, and the flight of the royal family to the National Assembly for safety, La Favette was deprived of his command. His humanity had once saved the place from destruction, but the Parisian mob now thirsted for blood. The Swiss body guards had no longer a protector to check the cruelty of their assaults. They were all massacred without mercy, though not without a gallant resistance. He lost his command at that ime for taking a bold stand against the heated opulace, and although the army professed still to love him, he withdrew in the night from the giddy throng of the soldiery, and the madness of arty zealots. Immediately his enemies gave loose o their fury, a price was set on his head, and the golden medal before presented to him, was broken to pieces by the common hangman. If his characer was now aspersed by the Revolutionists, his person, the moment he crossed the frontiers, was indangered by the persecution of the royalists and emigres. The petty Duke of Saxe Teschenarrest. ed the illustrious fugitive, and the gallows was actually in preparation for his execution. The King of Prussia then interfered and changed the sentence of death, to that of close confinement in the dungeons of Wessel and Magdeburg. After year's suffering in the latter, the Emperor of Austria next claimed him, and threw him into chains at Olmutz, where death seemed about to close his sufferings. It seemed as if all the despots of Europe wished to contribute to his sufferngs. Washington at this time attempted to obtain his release, and two gentlemen, Dr. Bellman and a young American, named Hugar, almost rescued him from prison, by a romantic and extraordinary they become familiar. To be happy at home is attempt. He was re-captured, and confined more closely than ever, but was permitted to enjoy the society of his wife and daughter. In 1797, Bonaparte effected his release, and offered to protect im. La Fayette, however, retired to Hamburgh. and lived privately until the overthrow of the French Directory. He claimed the offers then made him, and kept closely on his estate until 1815, when he was elected a Deputy from the depart. ment of Seine and Marne, was nominated to the Vice Presidency, and had 50 votes for the office of ! President. After the battle of Waterloo, it is said, he advocated the abdication of Napoleon, and acted with Fouche, in declaring the sittings of the Chambers permanent. The exile of St. Helena gave him credit for his intentions on this occasion, but according to Las Casas, "pronounced him to be the dupe of men and things." It is remarkable that Madame Campan expresses nearly the same opinion of him. One thing is certain, however, that La Fayette has ever acted with a single eye for he good of France. On the final restoration of the Bourbons he againfretired to private life, when he vas once more elected a Deputy, from La Sarthe. hough opposed by the whole weight of miniserial influence.-At the late election, however, he was unsuccessful, because the most unjustifiable neans were taken to prevent his success.

The leisure afforded him happily occurs at a ime when the whole American people are desirous to see him-and he will be received by them with universal joy. When we consider the serrices of this illustrious man, during the revolution, our hearts glow with love and admiration. And if unate, it was the fault of the people with whom he was engaged, the fickleness of the nation which te endeavoured to serve, and the bloody rapacity of the times in which he has lived. He is now sixty-seven years of age.

FOR THE SATURDAY EVENING POST. VIRTUE and VICE.

BY W. P. M. WOOD. Pure as the dew-drop on the lilv's breast. And fair as nature, clad in vernal vest, Celestial Virtue! from thy star-pay'd throne. At this lone hour, my humble effort own: Look down indulgent, and inspire my song, To sing the charms, that to thyself belong: Night's sable shade o'er half the earth is spread, And bashful twilight from the west has fled; Silence on tip-toe, softly treads around, And sweet oblivion lulls each busy sound; Hush'd is the scene—save where in vonder grove. Lone Philomela pours her notes of love ;-And Contemplation, musing o'er the woes, That chequer life to its eventful close, Searches why man, forsaking that fair way, Where virtue guides him, to perennial day, Prefers to tread the thorny paths of vice.

Where misery lures him, in fair pleasure's guise. Has Vice some charm, whose power is all her own Some good peculiar to herself alone?-Can she bestow the honest meed of praise. Or give content, or wealth or length of days?-Can she give quiet to the throbbing breast, When drown'd in sorrow, or with grief opprest Is hers the art, the ills of life t'assnage-To sweeten youth and "melt the frosts of age?" Alas! but seldom, are such blessings found In paths where vice leads to forbidden ground! Nor can she boast a single joy not spread Within the path where virtue's votaries tread: The purest bliss the human mind can know, How virtue's unpolluted source must flow ; 'Tis hers alone, the bleeding wounds to heal, That dire affliction makes the wretched feel;-Her smile makes light misfortune's heaviest blow, And scatters blushes on the cheek of wo;-She looks -and anguish straight forgets her pain She speaks-and hope glows in the breast again Where lately scowl'd the midnight of despair, And haggard grief was nurs'd by rankling care; lers is the art, the paths of life to strew With verdant landscapes, evergreen and new-To sprinkle flowers of amaranthine bloom, Around the rugged path-way to the tomb!

Such blessings wait not those who tread The fatal course by vicious pleasure led: For one poor moment, they perhaps may clasp heir idol pleasure, with unyielding grasp; But here the phantom drops his borrow'd guise, They to their bosoms hug the serpent-vice! Perchance, in fortune's sunshine they may bask, Or wear deceitful splendor's gilded mask, Or cut their way, on borrow'd wings, to fame, And hear hosannas soun 'ed to their name :-But still remorse will cling around the heart, Destroy their peace, and bid each joy depart! Their glory fades, their laurels are not green, And life itself becomes a wretched scene; The devious paths of vice, too late they know, Though strown with pleasure, terminate in wo! HAPPINESS. Happiness may be divided into three classesmiversal, private, and domestic. First, of universal happiness, the absolute wants of nature are few and fixed-those of imagination innumerable plained. This, from a generous desire to prevent and fleeting. The man who is hungry, and in need of food to appease the dreadful sensation, will not be found to be very scrupulous about "Grenadier, by that ladder you will mount the

placed in his way, he succeeded in leaving France I ing to the offer, when no doubt it would have wrotch in existence, who has not the means of permanent happiness in his power, if he only exert those means which Omnipotence has placed in his possession. Imagination is the painter-'tis she who gives those light shades which pollute the canvass with deformity, or captivate the eye with brilliancy. If the ignorant deny the truth of this assertion, I wish no stronger proofs than those observations which every day and hour furnish us. The labourer is heard singing on the scaffold, surrounded by dangers, toiling with fatigue-his countenance wearing the smile of contentment-his mind free from the commission of any crime, glorying in the abundance of his work, and laughing at the delicate walks of him who is pacing the footway beneath, and who calls himself a gentleman! He has no time to wish; he hears the rattling of conches beneath him without emotion; seldom if ever reflecting upon the ease or security of those within; he returns home with a "good conscience," and there humbly prostrating himself, returns thanks to God for his many favours.

> Secondly, private happiness-Private happi ness is to be found in those intervals of unbended amusement, when was shrinks into his natural dimensions, and throws aside the ornaments which he considers (in private) to be useless incumbrances, and which lose all their effect when the ultimate result of all ambition-the end to which every enterprize tends-and of which every desire prompts the prosecution. It is at home, indeed, that a man must be known by those who would make a just estimate of his virtues, or his happiness; for, "smiles are only occasional," and the mind is often dressed for show, in "painted honours and fictitious benevolence."

"Virtue alone is happiness below."

3d. Domestic happiness! Reader, would'st thou see a true picture of domestic happiness? Go to the cottage of the poor, and there it may be found. Oh! how imagination loves to dwell upon the subject-trace the lives of the happy inmates, from the hour when first they beheld one another -when their kindred souls first formed an attachment. It was not "love at first sight"-the play-thing of an hour-the flower which, when plucked, soon fades, to please no more. Oh, no! "'Twas friendship, heighten'd by the mutual

A Sailor's Description of the Manual Exercise. My lads-the first thing you have to do, is to inswer to your names-when you hear the word 'attention," you must bring both the starboard and larboard heels to bear together, keeping your jibstays taught bowsed up, and square your shoulders by the lifts and braces, clapping both your fists against your bends, one and all the same moment, till the words "stand at ease," when the hollow of your starboard foot must be smartly backed astern of the heel of the larboard one; you must also clap an over hand knot upon your fist athwart your bread bag after coming to attention, at the word "shoulder arms," rouse Brown Bess by the middle, and bowse her up from the lower tier of the starboard side, to the larboard bow, keeping a good look out that she dont make a kee lurch and capsize, otherwise you'll be apt to knock out your shipmate's toplights. At the word "secure arms," the starboard arm, which is now fast to the starboard bends, must go athwart your bread bag, in order to receive Brown Bess by the breech, clapping your larboard fist to her midship-be sure to have her muzzle ahead, so that her breech will come right under your larboard wing, so as to secure the fireworks from squalls, no tarpauling being allowed. After shouldering, at the word present arms," you slew Bess half round and seize her with the starboard fist, then fetch her up betwixt your toplights, so that your flying ribboom will be two inches from her midships; be sure to back the hollow of the starboard foot astern of the heel of the larboard one, during this motion: after bringing Bess from the larboard bow, the next is "advance arms," both of the two first motions of which are the same as " present," but at the third, you have her alongside of the starboard bends, seizing the guard with the starboard fist, so as to secure her alongside; so much for one lesson.

A new military work has been published in Paris. In the chapter on military eloquence the author mentions the instance of the brave General Chevert, at the seige of Prague. At the moment of placing the first ladder to mount to the assault, he called Sergeant Pascal, and said,

not reply, but continue to advance. He will demand a second and a third time, and then he will fire : he will miss you-you will kill him, and I shall be there to support you." The grenadier felt inspired by the spirit of the oracle, and all

succeeded as had been foretold. When Kleber was in Egypt, he sustained during five hours, with only two thousand men, the united efforts of twenty thousand. He was nearly surrounded, was wounded, and had only a narrow defile by which to escape in this extremity. He called to him a chef de bataillon, named Chevardin, for whom he had a particular regard -" Take (said he to him) a company of grenadiers; stop the enemy at the ravine, you will be killed, but you will save your comrales."- 'Yes, my General', replied Chevardin. He gave his watch and his pocket-book to his servant, executed the order, and his death, in fact, arrested the enemy and saved the French. There is something grand in the judgment of Kleber on the character of Chevardin; and on the side of Chevardin, what a capacity for self-devotion! What ascendancy in the one, what submission in the other! It is the heroism of Leonidas that dared to command, and the devotion of Decius produced by a simple word of confidence.

THE INN .- To a homeless man, who has no spot on this wide world which he can truly call his own, there is a momentary feeling of something like independence and territorial consequence when, after a day's travel, he kicks off his boots, thrusts his feet into slippers, and stretches himself, before an inn fire. Let the world without go as it may-let the kingdoms rise or fall-so long as he has the wherewithal to pay his bill, he is, for the time being, the very monarch of all he surveys. The arm chair is his throne-the poker his sceptre-and the little parlour of some twelve feet square, his undisputed empire. It is a morsel of certainty, snatched from the midst of the uncertainties of life; it is a sunny moment gleaming out kindly on a cloudy day .- Washington Irvine.

"WHO IS SHE?" Behold her stand in fairy mood,

in our study, wistfully biting our nails, and eagerly ransacking the recesses of thought, for the purpose of furnishing something for thy gratification, when lo! before us stood a fantastic vision, whose ludicrous dress and air, beggars our powers of description; her brows were twined with sprigs of the green bays of literature, which had been torn (oh, sacrilege!) from the mighty dead, surmounted by all the fooleries and fripperies of fashion; her waist was zoned with a substantial meridian, and her bosom heaved with breathless impatience, whilst with all the effrontery of presumptuous confidence, she thus broke silence, and roused us from our reverie :

"I am THE GENIUS OF THE AGE!-listen to my of an age, whose knowledge consists precisely and do-and is, withal, much more actively employed in every other person's business, than something more aeriform-something of the syllabub description, that goes down without swallowing, and sits lightly upon his stomach. This should be the "head and front" of literary refinement-the genuine mental refinement; and as it appears particularly amongst the young gentlemen and ladies, it has struck me, that such a promising taste, in the rising generation, should not be suffered to starve for want of food, and, especially, when this food is so plenty; for, our sedate and leaden-pated fathers afforded it but a poor market in their days, and left it to amass for the gratification and delight of their more squeamish posterity.

" Now, let me candidly toll you, that your literary melange is but meagerly furnished, for such an appetite. You are at least a generation too old fashioned. That grave, solid, stiff old way of our patriotic, but unlettered ancestry, might have suited their minds, that needed to be helped in every step of literature and science; but its day is past. There is no need now of telling fucts; for every body knows them. Do you suppose that our clderly people have spent their lives so unprofitably, as to be now capable of being instructed by your "moralist?"-and do you not know that young people of the present day are born with as much knowledge as former ly required a life to obtain? All that is no w required is, something that will call for no labour of thought; in a word, something to make listless people laugh. Away then with your "moralist;" and send a hint to your agricultural correspondents, and all those who write about peace and religion, and every thing which relates to the best interests of man, to put up their pens-the taste of the present age does not require their exercise-call into existence a new race of writers, and induce them to pour into your cornucopia, those ever-greens of literature and fancy which bloom so luxuriously in their hands-foster, and bring forth to full blaze those

"I have been much surprised myself at the truly wonderful advancement which the human mind has lately made in native strength and genies. It really seems, now-a-days, that children begin precisely where their fathers leave off. It used to be common for children first to learn to spell; but, at present, it is not uncommon to meet with young people who have gone even as far as the highest classes of our colleges without ever having applied themselves to this once only entrance into the paradise of literature and sci-

He can converse fluently upon almost any work you can mentionprovided the dull, philosophical parts are not considered; and for the attainment of all this knowledge, he requires no more than the reading of the table of contents, and a glance at the heads of chapters, together with a reference to some dictionary of arts and sciences.

"Formerly, the use of reading was to furnish helps to thought and practice; but now, it is chiefly employed to help one talk; and as this object can be accomplished without much study, few books are honoured with a thorough perusal except-novels. In these, the winding of the tale, and the variety of incident, together with the numerous dramatis personæ, do not admit of its being epitomized in a table of contents; and besides, these are interesting works-they have so much of love and fiction in them, and are, moreover, "so romantic," and draw so little upon the mind or conscience, that they deserve to be read. Their lessons of morality and religion are taught so gently, that one may receive them without even knowing it; and then they operate so mildly-without any of your calls upon conscience, or cant about death and eternity, as if any thing more were requisite for this virtuous age, over which it is my province to rule, than only a gentle hint about the deformity of vice, and the beauty of virtue."

LA FAYETTE -Mr. Persico, an accomplished artist of this city, (says the editor of the New-York Statesman) has just completed in clay a colossal bust of General La Fayette. Gentlemen who have seen the original pronounce it to be an admirable likeness. We can only bear testimony to the excellence of the workmanship. The countenance is strongly marked, and extremely intersting. Mr. Persico intends soon to finish the cast n plaster; but would previously be happy to have connoisseurs in the arts call at his rooms, No. 19 Marray street, N. Y. to examine the bust, and suggest any alterations.

LAFAYETTE was dear to the Maryland statesmen and soldiers of 1776 and 1784; in proof of which, among other evidences, is one extending to him the right of citizenship. They breathe the warm and strong feelings of those who knew him well .-They speak a language to which the heart of every American we hope, and doubt not, responds at this ime, in cheerful and hearty accordance.

An Act to Naturalize Major General the Marquis de Ledayette, and his Heirs Male, forever.

[Passed Nov. Session, 1784] Whereas the General Assembly of Maryland, inxious to perpetuate a name dear to the State, and to recognize the Marquis de Lafayette as one of its citizens, who, at the age of nineteen, left his native country, and risked his life in the late Revolution; who, on his joining the American army, after being appointed by Congress to the rank of Major General, disinterestedly refused the usual rewards of command, and sought only to deserve, what he attained, the character of patriot and soldier; who, when appointed to conduct an incursion into Canada, called forth, by his prudence and extraordinary discretion, the approbation of Congress; who, at the head of an army in Virginia, haffled the manœuvres of a distinguished General, and excited the admiration of the oldest commanders; who early attracted the notice and obtained the friendship of the illustrious General Washington; and who labored and succeeded in raising the honor and the name of the United States of

America ;-Therefore, 2 Be it enacted by the General Assembly of Maryland, That the margins de Lafayette, and his hems male, forever, shall be, and they, and each of them, are hereby deemed, adjudged, and taken to be, natural born citizens of this State, and shall henceforth be entitled to all the immunities, rights, and privileges, of natural born citizens thereof, they and every of them conforming to the constitution and laws of this state, in the enjoyment and exercise of such immunities, rights, and privileges.

SIR: The Congress, sensible of your merit to wards the United States, but unable adequately to reward it, determined to present you with a sword, as a small mark of their grateful acknowledgment. A letter from a gettleman of Petersburg, (Va.) low in France, dated Havre, June 14, 1824, says, "Almost the lasthour I spent in Paris, was it company with the vmerable La Favette-although 67 years old, he has preserved to that advanced age that vigor of mind and body which we do not always find in those that are much younger. He is very plain in his manners-speaks English flu-The first time I saw this distinguished votary of '79, was in company with the celebrated Gen. Fuery and about fifteen or twenty Americans. The General, seeing such a number of us together, all for the same object, said to Gen. La Fayette-Your children (pointing to us,) are the most affectionate in the world." The old veteran rose from his seat, with tears trembling in his eyes, and taking us all affectionately by the hands, said, " Indeed you are my children." His doors are ever open to the Americans, and there are very few who visit France without seeing him.

"While on my last visit with Mr. Barnet, the American Consul, Capt. Macy, of the fine new ship Stephania, one of the line of packets betwee Havre and New York, called to ask the General if he would accept of his cabin, and do him the honor to take a passage with him to the United States. This is the fifth or sixth application of the kind he has received since it has been known that he had declined the provision made by Congress for conveying him to the United States."

EUROPEAN AFFAIRS.

[From late English papers, received at New-York.] At the meeting of the British and foreign School Society, on Monday Mr. F. Buxton told the followng curious anecdote:—It had been his misfortune then very young to live with a gentleman, whose prejudices against the improvement of the poor were numerous and inveterate. There were, in that gentleman's opinion, three great causes of the demoralization of the poor-reading, writing, and arithmetic-(laughter)-and whenever a quarrel took place in his neighbourhood, he was in the habit of saying " That is the effect of education." If a theft or a murder were committed, "There." he would say, " is another test of the bad effect of education." In speaking of his own steward, this hater of improvement would say," "That man, to his credit be it spoken, is not able to read a word. or to write a figure; and yet he is, perhaps, the best accountant in the county." It was natural to inquire by what process of memory the steward kept his accounts. This was shown. A drawer was produced: in one compartment there was a parcel of beans, in another a parcel of peas, and in the remaining divisions, of grain. These were the symbols of various debts and payments, which, with the aid of a strong memory, the steward kept with great exactness, until one night a rat broke into his account box, and down went the account of what we, due from various tenants, and all was thrown into the wildest confusion and doubt (loud laughter.) From that moment be (Mr. Buxton) had been a convert to the superiority of written or printed symbols.

It was stated some time ago, in the newspapers, that Mr. Macready was about to quit the sock and buskin for the church; but if the following paragraph from the York Herald be true, it would appear that he has chosen the bar .-"Granby Inn, Harrogate.-We understand that the purchaser of this well established and excellent inn, which was lately advertised for sale in the York Herald, is no other than the celebrated Mr. Macready, of theatrical notoriety."

Extraordinary Operation .- Dr. Faverman, of Norwich, on the 9th June, performed successfuly a singular and dangerous operation on the child of Mr. Moore, a respectable grocer, of Ber street, by an incision into the cavity of the chest, from whence he extracted one pound eleven ounces of highly purulent matter. The patient had previously suffered from a prolonged distemper, the result of typhus fever, and subsequent inflammation of the lungs. The child, we are given to understand by Mr. Moore, is rapidly recovering its original state of health.

A Clever Robbery .- A gentleman, who attended resterday at the police office, Hatten garden, related the following robbery, which was committed some time ago, at the house of Mr. Lewis, in St. John's square, Clerkenwell :- About four o'clock in the afternoon, a man of genteel appearance and address knocked at Mr. Lewis's loor, and inquired if he was at home. It is supposed he knew to the contrary. On receiving an answer in the negative, he expressed a wish to see Mrs. Lewis. He was accordingly shewn into the dining room, and on Mrs. Lewis going to him he said he had an account to settle with Mr. Lewis, and that he came to pay him; and as he was not at home, he requested pen, ink, and paper, to leave a note for him. These were furnished him, and he wrote a note to Mr. Lewis, and, in the presence of Mrs. Lewis, he enclosed two ten pound bank notes in it. Observing wine in a decanter on the sideboard, he said he would take a glass. He walked round the room, and admired the pictures. He then sat down for some time and after conversing on different subjects, took his leave. Soon afterwards Mr. Lews returned, and on opening the note he found that it contained the following words :- " Sir, having occasion for a little silver plate, I have taken the liberty of borrowing it of you; -the enclosed will serve as a security for my returning it." On examining the supposed ten pound notes, they proved to be sham notes, not worth

The following decision, taken some time since from an English newspaper, but which got mislaid, will be read with no small degree of interest by the owners of our newspapers, most of whom, in the United States, hold as joint proprietors .-The question here decided has hitherto been considered as an unsettled case, and whenever it has occurred, has, we believe, been referred to arbitra tors, some of whom have decided one way and some another, but as it has never, that we have heard of, been the subject of a legal decision, the publication of the following report will excite some attention, at least with our brethren of the typeso says the New York Evening Post.

COPY RIGHT OF A NEWSPAPER. On the 4th curt, the Court of Sessian (Secon Division,) determined an important point regard-

ing the copy right of newspapers John and Peter Wilson, in 1803, established newspaper called the Ayr Advertiser, or West County Journal, which speedily became a lucrative concern, and theaceforward belonged to them equally. In 1809, Peter Wilson sold his half share to a third person, receiving a premium or price for the copy right, exclusive of the stock. The purchaser afterwards sold it to two strangers, receiving the same premium as he had paid.

John Wilson retained his original half share till is death in May 1821. Conceiving it to be a valuable part of his estate, he, by his will, conveyed his half share of the copy-right to his testamentary rustees. In all the changes of partners er proprietors, from the first establishment of the newspaper, there had been no written contract of copartnership betwixt them.

John Wilsn's trustees were about to sell his half hare, when the two persons who had last purchas ed the other half, presented a bill of suspension and interdict to have the trustees restrained, upon the allegation that there was no such thing as the copy-right of a newspaper; that the right to print and publish a newspaper exercised by two or more persons associated together, just resembled any other trade; and that upon the death of any partner, there being no written contract providing otherwise, the good will, as it is called, of the business, belongs to the survivors. Lord Meadowbank, n the Bill Chamber, appointed the bill to be answered, and granted the interdict. On advising the bill, with answers, Lord Cringletie appointed parties to prepare memorials to the court. In these memorials the case was fully argued.

The court were unanimously of opinion, that he right of printing and publishing a newspaper, or the share of such a right, however anomalous it may be in point of principle, and whether it might be called copy-right, privilege, property, or by whatever other name, is a valuable right. now perfectly known and understood, and is, by the common law, both transferrable inter vivos, and transmissible to heirs, independently of any written contract betwixt partners or proprietors. They, therefore, recalled the interdict, and refused the bill, with full expenses.

Fare Reduced again .- A passage to New-York can now be had, in the Citizen's Coach and New-union Line, for the moderate price of TWO DOLLARS! The Boats lay on the upper side of Market street wharf, and seats are engaged at the office, No. 13, of Mr. John Bowman, agent.

A numerous body of persons of colour, emigrants o Hayti, are preparing to leave this city and New York. The great advantage that will result to hose who may accept of the proffered liberality of President Boyer must be apparent to every reflectng mind. It is not surprising that some of the nost respectable families of this class of people are mong those who intend migrating; for they have ffered them every means necessary to make their change comfortable, besides a future opportunity, f they turn out useful and meritorious citizens, of advancing to posts of honor and profit under the Havtien government. A concourse of persons atended the meeting held on Tuesday evening last, at Bethel Church, to devise measures for their early departure, and resolutions were adopted confirmatory of the general favourable disposition towards has so long lain neglected by our corporation, Caizen Granville's mission: This agent is now in Philadelphia and will give every information to those interested to hear respecting the climate and natural advantages of soil which Havti possesses. The following extract will show more particularly the inducements held out to adventurers :- " Farmers who go with a view of improving uncultivated lands, (not wild and uncleared, but such as have been neglected, and are running up in bushes, intermingled with coffee plants, cotton, &c.) will find houses ready to go into, and have as much land appropriated for their immediate use as will be sufficient for their support; and if they improve it well, and conduct themselves with sobriey, they will have as much land given them as they can cultivate with profit, not less than 15 acres for each man-their passages will be paid, and four months subsistence provided for them, which will afford them sufficient time to provide for their own support, in a country where they can raise three crops of corn or other produce yearly-all of which passage, four months subsistence, and land, will be the donation or free gift of the government to them : and if they go in considerable numbers to the same neighbourhoods, they must at once see many decided advantages resulting from such a movement. Farmers who go for the purpose of renting lands already planted with cotton, coffee, sugar canes, vegetables, fruits, &c. or to work such plantations on shares, will find proprietors or landlords ready to rent on shares or otherwise, upon reasonable terms, under the protection of laws and regulations made for the government of such contracts-but must come under an agreement to go immediately o those farms, and to repay in six months the xpenses paid for them, and after they have faithfully fulfilled their engagements with their employers or landlords, they will be at liberty to turn farmers on their own account, and have lands given them to cultivate according to their good conduct. -Those who go as mechanics, traders, clerks or school masters, will be assisted in their different professions, and the expenses of their passages paid on their coming under an engagement to repay in six months. Forty coloured mechanics such as Carpenters Timber Sawyers. Blocksmiths, Caulk. ers, Pope Makers, Sail Makers, &c. capable of building and equipping small vessels, are also immediately wanted, to whom liberal encouragement is offered. The government will either purchase these vessels upon fair and liberal terms, or pay them generous wages per day. And if they have wives and children, land will be given them But it is always to be understood that the grants of land particularly, will be proportioned to, and considered as a reward for the characters which the different classes of emigrants may establish by their sobnety, industry and general good conduct. All religious professions are tolerated and left at full liberty to worship the Almighty Creator according to the dictates of their own consciences, and through the medium of their own forms and ceremonies, provided they do not disturb the public

A number of Indians, and their interpreters, arrived in this city on Monday evening last, from Baltimore. They belong to different tribes, inhabiting a large tract of country to the westward of the Rocky Mountain, considered as very numerous, being nearly 140,000 individuals. hey were never so far from their homes before, and have made but little progress towards civilization; they appear wholly unacquainted with our manners and customs, which strongly indicates itself by the incurious method and indifference with which they look upon every new object that presents itself to their view. Four of them are females, the squaws and daughters of chiefs who are good looking, and of similar colour: the men are equally striking in their features, being straight and well proportioned, evidencing great bodily strength. They have attracted considerable attention in the course of their tour, which they purpose extending as far as New-York, where they have gone, and return home by way of the Lakes. These chiefs, while in this city. among other public institutions, visited the asy-

LEGISLATIVE SPARRING - In the New York | explained to them the situation of the children, | more out of a desire to supplant it, in this region, and that they were capable of conveying to each other their wishes and opinions, by means of their fingers. This was too much for the credulity of the Indian without having satisfactory evidence of its truth. Accordingly be desired the interpreter to whisper to the teacher to ask one of the boys by signs ' who made him dumb :" on the question being proposed, the boy immediately with a piece of chalk, wrote the word "God" pon a black table against the wall. The Indian looked at it in silence, but as it conveyed no more idea to him than the Hebrew Alphabet, the interpreter perceived the dilemma and again whispered to the teacher to direct him to draw an animal something in the shape of a Raccoon -The teacher made the requisite signs, while the Indian watched him intently; the boy drew the figure, and the uncultivated Son of the Forest was not too proud to betra- his astonishment at this truly wonderful discovery, by which the condition of so many of our unfortunate fellow beings will be rendered comparatively happy.

> It is in contemplation, we have understood, and should our information prove correct, it will afford great pleasure to the residenters in the neighbourhood, and every belle and beau who may be capable of enjoying the delights of an evening's promenade, to learn, that the lot at the ower extremity of Dock street, now occupied as a lumber yard, and which William Penn, in his plan of the city, wisely determined should be reserved for public improvement, is to be opened shortly and laid out into beautiful walks. shaded by ornamental trees, and the whole to be enclosed by iron railings. The width, and current of air passing through this street, which will be rendered more salubrious by this arrangement, will make it desidedly the most desirable and pleasant in the city, and of course increase the value of property there. It is surprising that it when it might have added so much to the beauty of the city. New-York has gone before us in her public walks, and in most other respects she has left Philadelphia to look on with wonder and admiration at the spirit which animates her citizens, without making an effort to profit by the

This number is embellished with a very good ikeness of DE WITT CLINTON, Esq. painted by Trumbull, and engraved, we regret to sav. in coarse, unfinished style, by Leney. Correct delineations of the features of distinguished Ame rican Statesmen, are ever acceptable to Ameri cans; they call to mind the scenes which ren dered them illustrious, and with which thei names are identified. We would respectfull suggest, that for the benefit of the younger clas of readers, a biographical sketch should accom pany such delineations, that whilst they contem plate their features, they may at the same time be made acquainted with their deeds, and led to imitate them. It is a profitable and delightful task, to trace the majestic flood of human intellect up its beautiful meanderings, and impetuous cataracts, even to the little rill, trickling its course along, amongst pebbles and over water. falls, to the mountain spring. The vouthful mind, by contemplating its rise and its estuary, is spurred on to exertion, and is encouraged;

With pencil dipp'd in colours bright,

Draws " Hope," upon ambition's height. But to the contents of the number before us. The work still maintains its character for originality and independence, and in general, with due deference to the opinions of others. The first article is "On Modern Criticism," and is from the pen of the Editor, Dr. Malenry. It bears the impress of the writer's strong, good sense, and powers of reasoning, and is a lesson worthy of an attentive perusal, by all who are

concerned in the management of the press. The second article in the arrangement, is entitled "The Happy Return, or the Songster's Tale," and consists of a theatrical performance. somewhat in the style of Mathews, written in the year 1808, and in that, or the succeeding year, represented in this city. The article may e in taste for some, and was doubtless admitted for the sake of variety; but we are proud to say that our taste lies another way-and that we like t none the better for its imported, low vulgarities. The plan of the narrative is contemptible—the wit is all stale, and second-hand, and may mostly be found in another dress in the jokes of Joe Miller, or in its counter-part, " Mathews at Home."

Passing by the next five articles, and the conclusion of the "Remarks on the Memoirs of the private life of Maria Antoinette, Queen of France and Navarre," with the brief but hearty commendation, that we have found them interesting, and elegantly written, and in every respect creditable to the work and the writers, we come to an editorial article headed "The Degeneracy of the North American Review," which is merely introductory to "the manly and appropriate observations of a correspondent" upon the manner in which " The Wilderness," and other works, from the same prolific pen, have been treated by that journal. The articles contain some "unmanly" insinuations, and, especially the one by the editor, recriminates, in a manner which we are sorry to witness, in a journal which claims the elevated appellation of "THE AMERICAN MONTH-

Amongst others, we observe the oft-repeated story, that "the labours of an EVERETT and a SPARKS," were formerly more conspicuous on its pages than at present, and that "inferior writers seem to be too much entrusted with the support of its reputation." The fact is well known to those who know any thing about it, that its contributors are the same as heretofore, with the exception, that Mr. Sparks, instead of being an occasional writer, has assumed its management, and devotes his time nearly exclusively to lum for the Deaf and Dumb. The interpreter, it. Its "degeneracy," we apprehend, grows

and the "wincing of the gall'd jade," than any fault of the work.

The poetical department is respectable, and free from the monotonous nonsense of two wriers, who have heretofore held a conspicuous place in it. The number closes with a "Retrospect of Politics," written, as usual, with much bility and liberality.

A tragic event occurred on Wednesday afteroon, at a respectable boarding house in New-York. While the boarders were at dinner. Mr. Seaman, deputy sheriff, called with a writ for two ung men of the name of Hant, brothers, who ad just returned from an exercion to the Springs. They expressed their readiness to attend the sheriff, and asked permission to go to their lodging room for their hats. This was granted, but having remained longer than was expected, the sheriff requested the landlord to scertain if they had really gone to their room .-He knocked at their door, when immediately he heard the report of a pistol, which was followed in a few seconds by another. On entering the room, it was found that both the young men had destroyed themselves, having apparently each placed a pistol in his mouth, and literally blown o atoms the upper parts of their heads. The oung men were natives of the Island of St. Chomas, named Ralph and John Hart, aged 24 and 26 years. They had transacted business at Mayaguez, Porto Rico, under the firm of 1. & R. Hart. From this place, it is said they abscond ed some months since in a vessel which they had burchased and loaded on credit; and after visitg Curaco, Havana, and Jamaica, and disposing f the vessel and cargo, arrived at New York few weeks since. They had but just returned from the Springs.

By the brig Herald, which has arrived at Saem, from Guavaquil, we learn that the ship Kensington, of Philadelphia, had been purchased by General Bolivar, for thirty thousand dollars, and was fitting for a cruise. Captain Spry is to command her, having been appointed Commodore of the Colombian squadron.

CHESAPEAKE AND OHIO CANAL.

Information from Pittsburg states that the Board f Engineers employed to survey the route of this Sanal had arrived in that city on the 29th ult. hav. g been detained at Union town by the necessity completing all the instructions to the three pares of surveyors, to whom the different sections of he route have been allotted. The Board were to eave Pittsburg on the 2d instant for Big Beaver, about twenty-six miles down the Ohio. The part would consist of the three members of the Board Dr. W. Howard, Captain Poussin, Captain Dong tass of West Point, and Lieutenant Datton and Courtenay. They would probably be absent a month from Pittsburgh, and on their return they would meet the Pennsylvania Commissioners, and examine with them the communication between the waters of the Susquehanna and the west, b means of the Conemaugh and Junia ta-as also the route of a canal to connect the waters of the Sus quehanna with those of the Schuylkill, through Lancaster County.

FOR THE SATURDAY EVENING POST.

Messrs. Editors,-In looking over some old writings, I have come across a number of Comundrums, some of which I have heard, and some not, and which I send you to publish, for the amusement of the youthful part of your readers. FRANKLIN.

CONUNDRUMS.

1. Why is an Epithalamium like a woman hater?

2. What enters the church-door first, when a couple are going to be married? 3. Why is a tallow chandler the worst and most unfortunate of men?

4. Why is your head Royal? 5. Why are ancient histories like toes?

6. A word of one syllable, easy and short, Reads backwards and forwards the same. Expresses the feelings warm from the heart, And to beauty lays principal claim.

7. Two brothers we are, great burdens we bear, To which we are bitterly prest; And in truth we may say, we labour all day, And are empty when we go to rest.

8. Why is a coward like a mouse trap?

Proise .- There are three kinds-that which we yield, that which we lend and that which we pay .- We yield it to the powerful from fear, we lend it to the weak from interest, and we pay it to the deserving from gratitude.

Who writes as he speaks, speaks as he writes, looks as he speaks and writes-is bonest. Who writes an illegible hand, is commonly ra-

pid, often impetuous in his judgments. He who writes with insolence when anonymous and unknown, and speaks with timidity in the presence of the good-seems to be closely allied to

INVISIBLE-VISIBLE INKS .- If letters be traced on paper with muriate of cobalt, the writing is invisible; and by holding it before the fire, the character speedily assumes a green colour, which again disappears, as the paper cools .- The writing made with this ink may, therefore, at pleasure be made visible or invisible, by alternately warming and cooling the paper, if care be taken not to expose it to a greater degree of heat than is necessary to make the invisible writing legible. This experiment is rendered more amusing, by drawing the trunk and branches of a tree in the usual manner, and tracing the leaves with sympathetic ink. The tree appears leafless till the paper is heated, when it suddenly becomes covered with a beautiful foliage.

The sympathetic ink is prepared in the followng manner :- Put into a matrass one part of cobalt of zaffre, and four of nitro-muriatic acid; disgest the mixture, with a gentle heat, until the acid dissolves no more cobalt; then add muriate of soda, equal in quantity to the cobalt employed, and four times as much water as acid, and filter the liquor through paper .- The Chemist.

FOR THE SATURDAY EVENING POST. IMPORTANT TO FARMERS.

The universal complaint of Farmers in the Middle and Western states, of the lowness of produce and scarcity of money, demands the sympathy of citizens generally; and inasmuch as the sufferings of agriculturalists will eventually be felt by all, it becomes the duty, as well as in terest, of all, to endeavour to meliorate the condition of the Farmers : - But this cannot be effect. ed, without their co-operation. The difficulties under which the agricultural interest at present labors, may be fairly charged to the account of inveterate habit :-- For the Farmers do not, nor will not turn their exertions to supply the demands of the Market, until necessity compels them to it: it is to this cause owing almost exclusively, that the farming business is thus, as at present, palsied. We now import large quantities of Hemp, wool, and other raw materia, and export Flour, Pork, &c. Now a large portion of the lands occupied in the growth of wheat, would produce good, and abundantly more profitable crops, of Hemp and flax; the time and expense devoted to the rearing and fattening of swine, would in most situations produce an abundance of Sheep, which are at present, the most valuable stock of the farmer, and will continue to be. increasingly valuable. From the surplus product of wheat, little or no profit can be realized: In cattle, managed in whatever way, there is still less profit: What inducement then, is held out to the farmer to continue in the old custom, or rather habit, of raising provisions, rather than materia for manufacture; when every market upon the Globe is glutted with the former, and when an extensive and lucrative market is opened at home for the latter.

The cultivated part of our territory is annually increasing, while the market for our surplus is curtailed; or at best, stationary. For instance, the West India Islands, recently constituted our principal market for provisions-The river Mississippi alone, now disembogues an ample supply for those Islands! what then is the necessary rate of the balance of provisions on hand? and to what purpose are our farmers busied? How is advancement to be anticipated in this course? It cannot Gentlemen! It cannot! nothing but a dereliction of old habits, can renovate your funds! Much has been written and vociferated in your ears, by designing or ignorant men, in favour of

Commerce. But what, let me ask, must be the | THE WEST CHESTER STAGE, eventual result of Foreign intercourse, with the balance of trade constantly against us? Poverty! such is our present condition! No man is more friendly to commercial intercourse than I am; but I have long been convinced that our system must be changed; and so must yours: You must raise more sheep, hemp, and flax; and less cattle, hogs and grain, and you will inevitably succeed in the "unum necessarium" in human affairs-Realising the Cash!

BALM OF COLUMBIA,

An Important recent Chemical Discovery.

THE Ladies and Gentlemen of this city and elsewhere, are respectfully informed, that John Oldridge has fortunately discovered, by the power of Chemistry, the granddesideratum of preventing Hair from falling off, in Forty-Eight Hours from its first application. This Balm, will, most absolutely in the course of a short time, make the Hair grow Healthy and Thick, and also restores it again if the part is totally bald; likewise makes whiskers and beards grow rapidly. It also cores the Dandruff. THE Ladies and Gentlemen of this city

cures the Dandruff.
It has proved its ability to restore a full head of hair or those who were bald at 20 years of age, in the short time of 13 weeks. On those who were older it was longer in effecting the change, in proportion to age. Any person under forty years of age, may rest assured (provided they do not wear a wig) that this Balm will restore a covering of hair if it be wig) that this Balm will restore a covering of hair if it be regularly used. The young hair always appears on the part that was bald in the course of twenty-one days. Though the person who uses it be ever so old, by applying it occasion ally it will prevent the hair from falling off. It is prepared and sold as usual at his establishment, at one dollar per bottle, half a bottle fifty cents, by JOHN OLDRIDGE, No. 55 1-2, South Front, street, and No. 11, North Fourth is

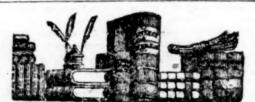

street Philadelphia; where Certificates may be seen. It is also sold at Mrs. THATCHER's, No. 447 Pearl street, New-York. jan 3-tf

PATENT CARBONATED SARSAPARILLA MEAD,

SAPANA WILLIAM MARRIOTT'S

OLD by appointment at WILLIAM MARRIOTT'S

Drug & Chemical Store, No. 45, North Fifth, near Arch street, where neither attention nor expense will be wanted to render it as perfect as possible.

W. M. having introduced this salutary beverage to the attention of the public, deens it but justice to say it has met the decided approbation of many of the most eminent of the medical faculty. In fact the many and well known invaluable obalities of Sarsaparilla have long placed it among the first of deparative medicines. Its unpleasant earthy sensation and taste have been with many an insurmountable objection to its use, but in its present form these disagreeable attributes are obviated, and the ingredients which enter into its composition to effect that intention possessing tonic properties, their union must produce a happy influence over the debilitated system, at dafford to those in the bloom of health a draught lively and refreshing as that from the Seltzer, Soda, or Mineral fountain. Those who are afflicted with langour, debi ity, or general emaciation will find in this a happy restorative. In cases of cutaneous affections, its good effects have been evidenced by the removal of pimples and eruptions in the face in a short time. Its general beneficial influence will doubtless induce parents to recommend it to their children, particularly where grossness of habit predominates.—And may it not be readily inferred, that the distressing sensations which arise from that nearly cureless complaint termed Indigestion or Dyspepsia may be much obviated and perhaps permanently relieved in the assistance rendered nature by its use? It is found to sit much lighter on the stomach than any artificial summer drink hitherto offered to the public; not producing that usinful sensation incident much than any artificial summer drink hitherto offered to the public; not producing that minful sensation incident to the use of most others, when taken in proportionate quantities. Its action on the system is imperceptible and its novel and peculiar taste by repetition becomes delightful,

CAUTION TO PURCHASERS.

CAUTION TO PURCHASERS.

The great demand and wonderful success of this medicine, has induced a number of persons to imitate it in various ways. Some are selling Sarsaparilla and other syrups, imposing them on the ignorant for the Panacca; others are mixing the genuine medicine with molasses, Sec. making three bottles out of one—thus retaining some of its virtues. These imitations and adulterations have, in many instances, protracted the sufferings of patients, in cases where the genuine medicine would have proved instantly efficacious—I therefore deem it a duty I owe the public, to acquaint them, that it is impossible, from the very nature of its conthem, that it is impossible, from the very nature of its constituents, to be discovered by chemical analysis; and, consequently, that all other mixtures represented to be mine, and sold as such, are fraudulent and lase impositions, calculated to deceive the ignorant and unwary. The genuine medicine has my signature on a label, representing Hercules and the Hydra, and my name on the seal.

Price \$3 per bottle, or \$30 per dozen. Communications, post paid, and orders from any part of he world, will receive immediate attention.

Printed Directions accompany the Medicine.
